

## Meal Planning Budget:

Using your same occupation and salary that you have been assigned and working with your roommate, you will be planning your meals for one month. You should plan on having a different meal for breakfast, lunch and dinner each day. You **Must** have at least 3 different items for breakfast for the month, at least 5 different items for lunch throughout the month, and at least 10 different items for dinner.

You will then work on answering these questions:

| Breakfast:                        | Lunch:                            | Dinner:                           |
|-----------------------------------|-----------------------------------|-----------------------------------|
| Meal 1:<br>Ingredients:           | Meal 1:<br>Ingredients:           | Meal 1:<br>Ingredients:           |
